

Building a Career Path Map for Societal Progress

• I have

- completed
 - 10th standard
 - Industrial training (Electrical, Mechanical,)
 - Intermediate (Maths, biology, commerce,....)
 - Polytechnique (Electrical, civil,...)
 - Undergraduate (any degree, any engineering degree, pharmacy, medicine, agriculture,)
 - Post-graduate (M.A, M.Sc, M.Tech....)
 - research degree (PhD in any branch)
- undergone a skill training (stitching, embroidery, ..)
- possess natural skills (speaking, singing, ...)
- job experience
- constraints/limitations (family, economic, physical, intellectual,...)

I have the following question

“What are my career options to improve my living standard?”

• Proposed Framework

- From each school/intermediate/Polytechnique /degree/post-graduate/university
- Identify potential alumni who are potential career path holders
- Model and collect career path details from each individual
- Design a career path extraction system to answer the query of career path seekers.
